drylin® lead screw nuts with locating spigot for
linear modules SWZ-W-1040 left-hand thread

- Material: iglide® J
- Thread type: Trapezoidal threads
- Design: Special part
- Cylindrical lead screw nut

Product description

Discover the drylin lead screw nuts designed specifically for linear modules SWZ-W-1040 with a left-hand thread. Made from durable iglide J material, these cylindrical nuts feature trapezoidal threads for smooth operation. Their unique design includes a locating spigot, ensuring precise alignment and stability. Upgrade your linear motion systems with this reliable and efficient solution. Perfect for various applications, these lead screw nuts are essential for optimal performance.

Requirements

Mould-resistant according to DIN EN ISO 846 Procedure A	No
---	----

General properties

Weight	6.29 g
--------	--------

Dimensions

Thread size	TR10X2
