Product description

Introducing the drylin® T guide carriage TW-12, a high-performance solution designed for durability and ease of use. Made with robust iglidur® J200 sliding elements, this carriage offers a 50% longer service life compared to previous models. Its adjustable bearing alignment ensures smooth operation, while the aluminum housing and stainless steel lid provide strength and reliability. Ideal for machine tools and woodworking, the TW-12 is perfect for applications requiring a lubrication-free, hygienic environment.
