

igubal® spherical cap for angled ball and socket joint

WPM-05

igubal® spherical cap for angled ball and socket joint

- iglidur® W300: Lowest friction in dry operation
- Low stick-slip tendency

Product description

Discover the igubal® spherical cap for angled ball and socket joints, crafted from iglidur® W300 material. This innovative design ensures the lowest friction in dry operation, making it perfect for applications with low loads and slow movements. With its remarkably low stick-slip tendency, you can expect smooth and reliable performance. Enhance your projects with this essential component that combines durability and efficiency seamlessly.

General properties

Weight	0.269 g
