

drylin W double rail WSB | Square | Quarter circle

WSB-06-30-RK300QS

drylin W double rail WSB | Square | Quarter circle

- Design: curved double rail
- Material: Aluminum, clear anodized
- Rail profile: Square
- Quarter circle

Product description

Introducing the drylin W double rail WSB, square, quarter circle from the renowned drylin family. This innovative product is designed for smooth and efficient movement, making it perfect for various applications. Its unique quarter circle shape ensures versatility and ease of integration into your projects. Experience reliability and quality with this essential component that enhances performance and functionality. Upgrade your systems with the drylin W double rail today.

Mechanical properties

|             |        |
|-------------|--------|
| max. length | 635 mm |
|-------------|--------|

General properties

|                   |                    |
|-------------------|--------------------|
| size              | 06-30              |
| Design            | curved double rail |
| Bending direction | Convex; Concave    |

Dimensions

|        |            |
