Product description

Introducing the drylin® W carriage, designed for curved rail applications with both convex and concave bending directions. This square carriage features a durable aluminium construction and is equipped with a manual clamp for secure operation. The sliding element is made from iglidur® I3 material, ensuring smooth movement and reliability. Perfect for your specific needs, this pre-loaded WWB carriage combines functionality with robust design.

Manufacturing and installation tolerances

H2-Tolerance	±0,25 mm
