Product description

Introducing the drylin W mounting plate – WWYR hybrid, a versatile solution for your mounting needs. Crafted from robust, corrosion-resistant anodised aluminium, it offers various lengths and widths for optimal fit. Customize your setup with a variety of liners, bearings, and slide plates, including options for manual clamps. For added convenience, a pre-assembled combination bearing and mounting plate is available. Seamlessly integrate with the complete drylin linear bearing product line for enhanced performance.
