

Antistatic Insulated Wire For Bonding/Grounding, With Dual 1/4-in Terminals, 3 feet.

Product Images

Short Description

- Also used as an extension

Description

Use antistatic wires to prevent sparks from static electricity generated by movement and flow of flammable liquids. During waste collection operations, use one antistatic wire to bond from a safety container to a receiving vessel such as a funnel, then properly ground by attaching a second antistatic wire to the drum and then to an earth ground. Standard wire lengths are 3-foot (1-M) and 10-foot (3-M); for longer reach, use several wires with ¼-in (6-mm) terminal ends. Custom length assemblies are available in 3-foot (1-M) increments.

Specifications

Model No	08506
UPC	697841001862
Brand	Justrite
International Model No.	08506
Material Specifications	Insulated Wire
Net Weight, lbs	0.5
Net Weight, kg	0.2
End Connection 1	0.25 Terminal
End Connection 2	0.25 Terminal
