Short Description

- Prevents the opportunity to place items on top of cabinet
- Reduce the chance of dangerous spills
- Aids in a company's 5-S initiatives, by keeping the area clean, neat and organized

Description

Justrite's Cabinet Cover is an easy way to prevent the placement of potentially dangerous items on top of safety cabinets. Placing items on top of the cabinet could cause it to tip over. A spill or leak of incompatible chemicals could create a dangerous interaction with the contents in the cabinet or have a negative effect on the metal construction. This cover promotes safe storage practices and encourages good housekeeping. It helps reduce the chance of fines or citations, prevent spills or leaks in front of and around the cabinet, and

reduce the risk of external fire load, which could negatively affect how long the cabinet is effective against fire and explosion. Strong, industrial strength tape is included for secure attachment.
