

4' x 6' Panel, QuietSite™ Premium Sound Barrier Kit - 26462KT

Product Images

Professional Appearance

QuietSite™ barriers **reinforce your commitment to safety,** environmental care, and community responsibility.

QuietSite™ Premium Panels

Premium panels **include hook and loop fasteners and internal magnets** for a seamless, secure link between panels.

Heavy-duty grommets for **fast mounting** to frames, fencing, walls, and more

Unique acoustic core **absorbs noise** and vinyl outer layer reflects noise

Foldable design for **easy transportation** and storage

Justrite®

QuietSite™ Noise Reduction Barriers

Justrite QuietSite™ Noise Barriers **reduce noise at the source** to help businesses comply with ordinances, protect workers, and minimize disruption to surrounding communities.

Short Description

Key Benefits

- Integral magnets and hook and loop fasteners on panels offer multiple attachment options for quick and easy installation by one person
- Unique acoustic core absorbs noise and vinyl outer layer reflects noise—helps reduce perceived noise by half
- Foldable design for easy portable transportation and storage
- Fire-resistant: Meets NFPA 701 Method 1

Description

The 4' x 6' QuietSite Premium Noise Barrier Kit model 26462KT provides a complete, ready-to-deploy solution for reducing noise in demanding work environments. Each kit includes a QuietSite Premium Sound Barrier Panel, a sturdy metal frame, and a weighted base for quick, secure setup in almost any location. Designed to both absorb and reflect sound, the system effectively reduces noise at the source to help work crews comply with state and local noise regulations while maintaining safer, quieter, and more productive job sites.

Tested to ASTM E90 for sound transmission loss and ASTM C423 for sound absorption, QuietSite barriers can reduce perceived noise levels by up to 50 percent. In real-world terms, they can lower the perceived sound of a 90-pound jackhammer to that of a household blender. The panel's integrated hook and loop fasteners and embedded magnets eliminate gaps between adjoining panels, ensuring a continuous seal that enhances noise control and creates a clean, professional appearance.

Built for flexibility, each lightweight panel attaches to the included metal frame with minimal effort, allowing one person to assemble or reposition barriers as needed. The UV- and water-resistant construction

withstands harsh conditions, while the mold-resistant mesh backing promotes drainage and keeps the system clean and effective over time. QuietSite kits are ideal for temporary and permanent installations across a wide range of industries, including construction, utilities, manufacturing, energy, and event management.

Specifications

Model No	26462KT
UPC	697841270077
Brand	Justrite
Color	Gray
Material Specifications	PVC Coated Polyester, Powder Coated Steel
Chemical Resistance	Impervious to Water, resists most Acids, resists most Solvents, resists dust, resists grease
Net Dimensions (W x D x H)	73.5" W x 1.5" D x 48" H
	1866.9mm W x 38.1mm D x 1219.2mm H
Includes	(1) 4' x 6' Panel, 1 metal frame kit, 1 base (foot)
OSHA Compliance	Helps comply with OSHA recommendations for noise reduction within work environments

Prop 65
