

4' x 8' Sound Barrier Panel, QuietSite™ Premium - 26466

Product Images

Heavy-duty grommets for **fast mounting** to frames, fencing, walls, and more

Unique acoustic core **absorbs noise** and vinyl outer layer reflects noise

Foldable design for **easy transportation** and storage

Create Custom Barriers

Combine panels and frames together to create **custom barriers** to fit any need.

QuietSite™ Premium Panels

Premium panels **include hook and loop fasteners and internal magnets** for a seamless, secure link between panels.

Justrite QuietSite™ Noise Barriers **reduce noise at the source** to help businesses comply with ordinances, protect workers, and minimize disruption to surrounding communities.

Short Description

Key Benefits

- Integral magnets and hook and loop fasteners on panels offer multiple attachment options for quick and easy installation by one person
- Unique acoustic core absorbs noise and vinyl outer layer reflects noise—helps reduce perceived noise by half
- Foldable design for easy portable transportation and storage
- Fire-resistant: Meets NFPA 701 Method 1

Description

The QuietSite Premium 4' x 8' Sound Barrier Panel 26466 provides high-performance noise reduction for construction, industrial, and infrastructure applications where sound control and professional presentation are critical. Each panel combines an acoustic-absorbing inner core with a durable, sound-reflecting exterior to reduce overall noise levels and create safer, more compliant job sites.

Tested to ASTM E90 for sound transmission loss and ASTM C423 for sound absorption, QuietSite barriers can reduce perceived noise levels by up to half. This reduction is equivalent to changing the sound of a 90-pound jackhammer to that of a typical household blender, making them a dependable solution for managing occupational and environmental noise.

The Premium model includes integrated hook and loop fasteners and embedded magnets along the panel edges, which eliminate gaps where panels overlap. This ensures a continuous, secure seal that enhances acoustic performance and provides a clean, uniform appearance. Despite their rugged design, the panels are lightweight and foldable for easy transport and installation by a single person.

Built to endure demanding environments, the QuietSite Premium panel resists UV exposure, moisture, and mold while maintaining consistent acoustic performance. It is ideal for both temporary and long-term applications where durable, professional-grade sound control is required.

Specifications

Model No	26466
UPC	697841270060
Brand	Justrite
Color	Gray
Material Specifications	PVC Coated Polyester
Temperature range of the material	-40 – 180 F
Chemical Resistance	Impervious to Water, resists most Acids, resists most Solvents, resists dust, resists grease
Net Dimensions (W x D x H)	96" W x 1" D x 60" H
	2438.4mm W x 25.4mm D x 1524mm H
Includes	(1) 4' x 8' Panel
OSHA Compliance	Helps comply with OSHA recommendations for noise reduction within work environments
