

Steel Cross-Brace Drum Dolly for Single Drums - 28270

Product Images

Short Description

Durable steel for long-lasting performance and reliability X-shaped cross-brace deck with surrounding support ring prevents drums from sliding off while allowing liquids to pass through Generously sized platform accommodates Single Drum Collection Center (No. 28685) or standard 55-gallon (200L) drums Makes heavy drums portable in the vertical position, reducing manual handling risks

Description

The Justrite Steel Cross-Brace Drum Dolly (Model 28270) offers a simple yet effective solution for making vertical drums portable and easily repositioning heavy drums throughout your facility. It is ideal to accommodate the [Justrite Single Drum Collection Center for 55-gallon Drums \(model 28685\)](#) or a 55-gallon drum. The dolly features an X-shaped deck that allows liquids to pass through, making it lighter than solid-deck alternatives while maintaining excellent functionality.

This steel drum dolly is ideal for warehouses, manufacturing facilities, and any environment where drums need to be transported safely and efficiently. The cross-brace design provides the perfect balance of strength, drainage capability, and weight reduction when moving heavy drums.

Whether you're managing hazardous materials or simply need to reposition heavy drums around your workspace, the Justrite Steel Cross-Brace Drum Dolly delivers reliable performance while helping to protect workers from potential injuries associated with manual drum handling.
