Product Images

Short Description

- Convenient drum handling and dispensing with built-in spill containment
- Compliance with NFPA 30, OSHA, EPA, SPCC, and fire codes
- Portable, ergonomic design
- Sump capacity of 66 gal (250 L)

Description

The Justrite EcoPolyBlend™ Spill Containment Indoor/Outdoor Caddy (model 28664) is a portable unit with wheels that allows one person to easily transport a full 55-gal (200-L) drum.

The ergonomically designed caddy measures 32 in W x 26 in H x 72 in D (813 mm W x 660 mm H x 1829 mm D), with two tension straps to hold drums securely in place. A 66 gal (250 L) spill sump contains chemical spills, eliminating hazards and hassles. The exclusive open-view sump design makes cleanup simple and quick, and the durable yellow polyethylene construction provides maximum corrosion resistance and leakproof protection.

With a net weight of 120.0 lb (54.4 kg) and a safe allowable uniform distributed load of 1250 lb (567 kg) based on a service temperature range of -30°F to 120°F (-39°C to 49°C), this caddy is extremely sturdy. It is EPA, SPCC, NFPA 30, OSHA, EPA, and SPCC compliant and meets fire codes.

Why do you need it??

Drums need to be moved — and they should be moved in the safest and easiest manner. Using a caddy not only allows for convenient, ergonomic movement with ease, but it easily accommodates a full leak from a 55 gal drum, with simple cleanup from the open-view sump.

This is more than just a hand truck for drums or barrels. Model 28664 serves as a specialized apparatus that makes it easy to move drums on and off spill pallets. Using a caddy improves safety for employees and others, by minimizing injuries and negating unnecessary spills.
