- Sized for easy rolling through interior doors
- Meets and exceeds ATF 27 CFR, Part 555 requirements
- Durable 12-gauge steel construction lined with 1/2 inch of plywood
- Resistant to fire, weather, and unauthorized access

Description

Ensure the safety and security of high explosives within your facility with the Justrite DynaLoc Type 2 Indoor Explosive Storage Magazine, model EL451. Designed with portability and compliance in mind, this storage solution is specifically engineered for the secure storage of up to 50 lbs. of high explosives or ammunition, meeting ATF 27 CFR compliance standards.

The Justrite DynaLoc Type 2 Indoor Explosive Storage Magazine EL451 features 4-inch casters (two swivel and two straight) for effortless movement through interior doorways and transportation flexibility. Constructed of a hand-welded 12 gauge steel body and a non-sparking 1/2" plywood interior, it offers enhanced durability and protection. A secure locking mechanism that includes a cam lock door handle and two secure locking hasps with a steel hooded cover help deter theft. The double locking door feature, with hinges and hasps securely welded, ensures that these components cannot be tampered with or removed when the doors are locked.

The exterior and interior surfaces are protected with a high-performance coating system, comprising a modified phenolic alkyd resin base coat and an acrylic alkyd enamel topcoat. This finish ensures chemical resistance inside and offers protection against abrasion, corrosion, and UV damage externally.

Additionally, welded lifting lugs on the unit facilitate easy lifting via forklift or crane, enhancing its maneuverability. The magazine opens from the front with a hinge on the right side.

Ideal for military/law enforcement agencies, municipal storage, and contractors, DynaLoc Type 2 explosive magazines cater to a broad range of explosive and ammunition storage needs, ensuring safety, security, and compliance.

Specifications

Model No	EL451
UPC	850066616048
