

OSHA Danger Safety Sign: Gasoline, 10" x 14" - MCHL245VA

Product Images

Short Description

- Clearly alerts workers and visitors to the presence of gasoline, reducing the risk of accidental ignition
- Prominently displays the OSHA-compliant “DANGER” header, signaling a hazardous situation that could result in death or serious injury if not properly managed
- Helps facilities comply with OSHA regulations for chemical hazard communication and workplace safety signage
- Durable aluminum construction resists UV, chemicals, abrasion, and moisture, ensuring long-lasting visibility in demanding environments
- Standard 10” x 14” size and bold design make the sign easy to spot and read from a distance
- Lightweight (0.56 lbs) with 3/16” mounting holes for easy installation on walls, doors, or storage areas

Description

The OSHA Danger Safety Sign: Gasoline (MCHL245VA) is designed to enhance workplace safety by providing a clear and unmistakable warning about the presence of gasoline. Featuring the universally recognized “DANGER” header, this sign communicates the severe risks associated with gasoline, including fire and explosion hazards, ensuring that both employees and visitors are aware of the need for caution. Manufactured from durable aluminum, the sign is built to withstand harsh industrial conditions, including exposure to UV light, chemicals, and moisture, making it ideal for both indoor and outdoor use. Its 10” x 14” format and bold lettering ensure high visibility, while the lightweight design allows for easy mounting in critical areas where gasoline is stored or handled. By clearly marking hazardous areas, this sign helps you meet OSHA safety requirements and reinforces your commitment to maintaining a safe work environment.
